Bruno und ich

CORNELEN

Bruno und ich is aimed at pupils between the ages of six and eight who are learning German as their first foreign language. The textbook is adapted to children’s abilities and needs: A colourful, attractive layout, varied and child-orientated tasks, emotionally appealing topics and a gentle linguistic progression make lessons a lot of fun and encourages all pupils to participate. The focus is on the playful learning of language: through rhymes, poems, songs and learning games. Accompanied by bear Bruno, children subconsciously practise linguistic structures, learn correct pronunciation and expand their listening comprehension. The student books are divided into twelve chapters, each with five sections: pictures introduce new linguistic structures and are followed by hands-on activities such as role-playing games and a song per chapter. Afterwards, the language that has been learned is consolidated with listening comprehension tasks. In the final task of the chapter, “The Bruno Project”, different groups or classes work together. The book concludes with a large illustrated glossary. The audio material is available to download or on an Audio-CD. The teachers’ book is available online on the publisher’s website.

*Paul, Lisa & Co.* is a fun and easy way for pupils to reach level A1 of the CEFRL in 3 levels. *Paul, Lisa & Co. Starter* provides an easy-does-it introduction to the German language - smooth and gentle with no reference to grammar rules - and prepares learners for the next stage of the course - *Paul, Lisa & Co. The broad range of practice material in the course supports a holistic and task-based approach to teaching. In the coursebook the children create their own portfolio at the end of each lesson. *Prima - los geht’s* is for children who are learning German as their first or second foreign language. The series provides suitable content for this age group in a modern, child-friendly layout and enables playful learning of German in a variety of lessons. These cover about 4 lessons each and offer insights into the lives of children in the German-speaking countries. Playful tasks build children’s communication skills, and numerous songs reinforce newly learned structures. Klasse
KLETT

Klasse! stands for communicative and action-oriented teaching, focusing on creativity and consistent learner involvement.

Exercises for multilingualism and, from A2, for language teaching build on the knowledge of the learners and show a close connection to the real application of language and CLIL tasks make it possible to combine German content with other subjects.

Relevant themes and funny comics motivate students to speak and act. Videos show scenes and stories from the everyday life of young people in Germany, teaching cultural studies and practising comprehension.

Humorous clips on speech and authentic communication make speech comprehensible and integrate youth language, gestures and facial expressions. Grammar clips help students to understand new structures. An additional section on geography in the plateau chapters gives a more in-depth insight into Germany and its people.

In the section Free choice, learners can choose their own tasks – depending on difficulty, skill, or interest.

The coursebook and workbook both contain 12 chapters; the coursebook offers gentle progression with activity-oriented tasks and projects and summaries of vocabulary, speech, grammar and self-evaluation sections.

Planet Plus

**HUEBER**

*Planet plus* is the revised edition of the classic course. The course has new content to offer, short units and a modern design with a host of photos that will appeal to teenagers. At the same time the familiar language progression and easy-to-understand structure of the course are retained. *Planet Plus* consists of two separate half-length books per level with each book containing four modules, each with three short units dividing the substance of the course into more manageable portions in which the short stories in the modules form the familiar framework. To accompany the coursebook from level A1 onwards entertaining film material is now available - two films per book that follow exactly the content and progression of the coursebook. A new feature of the design is the presentation of learning objectives in an extra column. Students are able to see what is expected of them in each lesson and independent learning is encouraged. Whenever new content is practised, previously encountered material is revised at the same time consolidating the whole syllabus. The new magazine pages at the end of the coursebook will make classroom teaching more interesting with games, cultural background material and suggestions for teaching. The separate workbook now also has a new full-colour design and forms a perfectly integrated extension to the writing, listening, reading and self-discovery grammar practice offered by the course. Mini tests in the form of interactive exercises enable pupils to easily test their level of knowledge for themselves. Wir neu
KLETT

Wir teaches young people to communicate on topics relevant to their lives and develop a broad understanding of the language. This new edition has a combined coursebook and workbook with a new layout and new, updated photos and illustrations. The books follow a modular structure and the layout is clear and colourful to hold pupils’ interest and encourage them to participate through games and songs. New material is introduced in small recurring steps with exercises for all four skills. Grammar is introduced throughout the sections for pupils to formulate rules themselves with special exercises to apply the grammar they have learned. Each module concludes with revision exercises, a grammar summary and tasks that encourage language production.

Mit Uns
HUEBER

Mit uns is a course for advanced learners of German, working on their previous knowledge of the language and systematically developing it further.

The course is very clearly divided up into modules: the topics in each module are presented by personable teenagers who create a personal and emotional rapport with young students. A wide choice of authentic reading and listening texts take account of teenage interests and train their reading and listening strategies, and encourage learners to form their own opinions and gain new insights.

From the very beginning Mit uns puts the productive skills of speaking and writing at the forefront of the language learning process. Authentic writing stimuli and a variety of projects promote oral and written powers of expression. A great deal of emphasis is placed on transparent and comprehensive exercises and tasks that encourage language production - in both independent as well as cooperative forms of learning.

Part and parcel of work with texts in Mit uns is the presentation of grammar structures in the coursebook that can then be discovered, revised and extended in the workbook where students are required to formulate the rule themselves independently. In conjunction with the coursebook the vocabulary work included in the workbook helps to extend the young learners’ vocabulary and give them the necessary strategies required for their own independent vocabulary acquisition. Specific writing practice materials in the workbook aim to prepare young learners for the DSD 1 & 2, Goethe-Zertifikat B1, B2 & C1 and Prüfungen des ÖSD exams and at the same time to improve their own writing skills. The accompanying audio-CDs contain all the listening texts from the coursebook and the listening texts from the pronunciation training programme in the workbook.

HUEBER

This course for beginners uses the theory that feelings and stories about other people is what encourages learners to actively engage in their language learning from the beginning. Each book contains 24 chapters. Material is introduced in a story telling form - with a scene-setting situation and listening text, accompanied by a picture dictionary to illustrate new vocabulary. Each chapter closes with writing practice and speaking exercises or a mini-project to round off the topic. Four additional chapters offer supplementary resources including magazine style pages with supplementary reading texts; activities to accompany the film clips on the course DVD; Projekt Landeskunde and songs. **Motive**

HUEBER

You can achieve an objective much more quickly by concentrating and dealing with it systematically. Motive follows this principle with a clearly structured course that allows students to learn things quickly by a process of discovery, cognition and association. Each chapter in the course has clearly constructed units covering the basic syllabus for levels A1 to B1. The initial page of each lesson reacts to students’ previous knowledge and picks up on what they have already learnt. Three double-page spreads follow presenting in turn a reading text, a listening text or a topic of cultural interest as a vehicle for new language. At the end of each lesson there is a short summary of the relevant grammar and speech functions. The workbooks contain extensive exercise material as well as special writing practice which can be completed at home or in the classroom. Vocabulary and grammar are dealt with in a systematic way enabling students to learn quickly. From the very beginning, longer reading and listening texts on interesting topics and stories combine skills training with vocabulary and grammar acquisition. This creates a network of knowledge that lasts and quickly increases. The accompanying CDs contain all the listening texts from the coursebooks. A single volume edition is also available.

Starten wir! promotes learning in small steps. The content concentrates on everyday topics, language use and language structures and is presented on double-page spreads, each designed to cover two teaching units so it can be easily divided into manageable portions and is well suited to all types of language course.

Each double-page spread starts with a warm-up introduction, then practices all the key skills and ends with a task to test the acquired knowledge in a meaningful context, e.g. by designing posters, questionnaires, role plays or the writing of WhatsApp messages or blogs. Language competency is built up using the lexical approach (among others): concentrating on learning “chunks” of language and the development of wordfields. Xtra lesen sections complete each unit with a reading comprehension text and exercises.

The coursebook and workbook are kept separate and are pleasantly light and slim as a result. The clear structure, the intuitively designed exercises and easy to understand instructions make immediate involvement possible without any lengthy preparation.

The workbook contains one or more extra exercises parallel to each coursebook exercise numbered identically. Dictations, exercises comparing language usage and the vocabulary to be learnt per lesson complete the package.

Smartphones and tablets are not only part of the content and practice material, they can also be used in class to solve activity-based tasks or via the free Starten wir!-app to download learning comprehension texts.
